THE CAYMAN ISLANDS GAZETTE INTELLECTUAL PROPERTY EDITION: the official newspaper of the Cayman Islands Intellectual Property Office is published fortnightly on Monday. The next issue (16/19) will be published on Monday 12 August 2019.

TRADE MARKS

Applications for Registrations

Trade mark application was received in the Cayman Islands

On: 09 August 2018

No: T0000626

Word/Mark: **QUALCOMM**

Class List:

- **09 for** Computer hardware; computer software; central processing units (CPU); integrated circuits; microprocessors; microcontrollers; semiconductors; modems; sensors; battery chargers; accelerometers; applications processors; circuit boards; circuit board assemblies; data conversion circuits; data storage devices, namely transponder chips and tags and card packages containing same; development boards, evaluation boards and reference design kits for semiconductors, sensors and software; digital signal controllers; digital signal processors; direct digital synthesizers; earbuds; electronic key cards; electronic identification cards; electronic labels, electronic stickers and electronic tags for identification and security purposes; magnetic coded cards for use as electronic tickets; electronically encoded identity wristbands; headphones; high power electronics, namely radio frequency (RF) amplifiers, high side switches and battery sensors; microcircuits; microcomputers; mobile phones; near field communication (NFC) technology-enabled devices; radio frequency transistors; wireless communication devices for recording, organizing, transmitting, receiving, manipulating, and reviewing voice, text, data, image, and audio files; computer hardware, software and firmware, central processing units (CPU), semiconductors, integrated circuits, microcontrollers, and analysis and trace, all for use in the development of stand-alone software programs used in devices such as network switches, engine control modules, cat-scan machines, industrial automation controllers, avionics and wireless handsets; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in industrial, consumer and automotive applications; computer hardware and computer software for transferring, storing, converting and displaying medical device data; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID and NFC chips and tags; computer software for charging smart phones, tablets, and mobile electronic devices; computer software for enabling functionality of safety and testing systems, apparatus and equipment; computer software for enabling functionality of sensors for use in automotive, consumer, industrial and medical applications; computer software for managing computer networks; computer hardware and software system for tracking people, objects, and pets and using GPS data on a device on the tracked people, objects, and pets; computer software, hardware and chipsets for use with wireless communication apparatuses, consumer electronic devices, smart phones, digital cameras, IP cameras, drones, unmanned aerial vehicles (UAVS) and wearable mobile computers; computer peripherals for processing digital signals, for processing background data and information on computer operating systems, for tracking user activity and location, for enabling activation by speech and touch and for detecting sensory cues and launching applications that correspond to specific sensory cues and computer software, hardware and chipsets for use with these goods; computer software, hardware, and chipsets for streaming music and for synchronizing audio speakers in consumer electronics devices; computer software, namely compilers, linkers, support software to assist in the development of stand-alone programs, and software for assisting in the development of object oriented software applications, such as database systems; computer software, namely operating systems, board support packages (BSPS), virtualization technology software, hypervisor software, embedded software, applications programming interface (API) software, software libraries used to create other computer software; applications software for automotive, consumer, health care, medical, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications, protocol stacks, configuration software; content filtering software, namely, computer software for controlling content made available to a user; control plane software; data plane software; data processing apparatus and software for enabling, controlling, managing and monitoring all aspects of a paperless payment and access system employing RFID (radio frequency identification) and NFC (near field communication) technology,

including allowing users to recharge their payment accounts remotely; deep packet inspection software; downloadable computer software for developing computer hardware and software for chipsets for wireless devices; enterprise security software for use in gateway and other networking devices to provide network security; firewall software; integrated networking, security, and collaboration software; internet security software; intrusion detection and prevention software; load balancing software; VPN (virtual private network) operating software; integrated circuits, computer hardware and software for signal processing in wireless communication apparatuses, consumer electronics devices, portable media devices, mobile gaming devices, pocket computing devices, and smart phones; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers; recording discs; computer network interfaces devices; electronic, electro technical and electromagnetic modules; data processing equipment; data storage apparatus; interfaces for computers; smart cards; smart card integrated circuits; RFID chips and tags; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID chips and tags; contactless smart cards; dual interface smart cards; dual interface integrated circuits that provide a link between contactless cards and contact cards; writers and readers for wireless transmission to and from transponder chips; electronic apparatus for writing and reading of wireless transmission to and from transponder chips; computer programs for controlling transmission of data to and reading of data from transponder chips; data processing machines for fare determination using transponder chips; encoded smart cards; computer hardware, software and peripheral devices used for access control and authentication purposes; wearable activity trackers; wearable computer peripherals; smartphones; wearable telecommunication apparatus; multicore processors; application-specific integrated circuits (ASICs); integrated circuits embedded with software; signal processors; digital signal processors (DSPs); vector data processors; vector signal data processors; communications data processors; network data processors used in network and telecommunications equipment; wireless baseband data processors; base stations on a chip, namely wireless base stations on a chip; integrated circuits, namely system basis chips and systems on a chip (SOC); multicore microcontrollers; semiconductor chip sets comprised primarily of semiconductor chips; integrated circuit modules in the form of semiconductor packages and packaging, namely redistributed chip packaging (RCP), and systems-in-package (SiP); radio frequency (RF) power transistors; radio frequency semiconductors; sensors, namely, inertial sensors, pressure sensors, magnetic sensors, touch sensors all for use in automotive, consumer, and industrial applications; proximity sensors; radar sensors; capacitive sensors; acceleration sensors; gyro sensors; sensors for computer interfaces featuring software, firmware and electronic integrated circuit chips; sensor systems comprised of sensors, computer software, microprocessors, microcontrollers, and logic or wireless protocols for enabling functionality of sensors for use in automotive, consumer, and industrial applications; electronic test instruments for developing and testing microprocessor-based systems; semiconductor memories; semiconductor devices, microcontrollers, integrated circuits, circuit boards, chipsets, all for management of operating frequency, voltage and power, optimization of static and dynamic power, power management, power optimization or power reduction; semiconductors, sensors and software for use in automotive, consumer, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications; semiconductors and software for use in healthcare and medical applications; semiconductors, sensors and software for use in wireless connectivity, battery management, smart grid, smart metering applications, engine control units (ECUs) and tire pressure monitoring systems (TPMS); microcontrollers, firmware, sensors, and radio frequency (RF) and analog circuitry devices for use with energy efficient wireless chargers; printed circuit boards namely evaluation boards and reference design kits consisting of software for semiconductors, sensors and software; semiconductors and software for use in portable medical devices, diagnostic and patient monitoring devices, therapy devices, and medical imaging devices; computer application software, namely, computer software for use in applications for multimedia, graphics video, audio and numerically intensive computations; computer network switching software; computer convergence network software; computer network collaboration software; quality of service software; network access software; networking software for operation of chipsets; networking software for content processing; computer software, namely, firmware, applications and development tools, for use in network content processing; failover prevention software; stateful packet inspection software; stateful application inspection software; enterprise security software; wireless radio controller software; command line management software; voice over IP software; video over IP software; networking and security software for use with unified threat management equipment, gateways, integrated access devices, routers, switches, controllers, base stations, hubs, and security appliances; utility software for facilitating computer use at remote locations and for facilitating communications among mobile users over networks; computer software for providing security to remote users and for implementing computer, software, and network security measures for remote users; component-based software modeling tool featuring a graphical user interface, automatic code generators and built-in knowledge-base for use in the rapid design, development, implementation, verification and optimization of embedded applications;

software for use in developing other software titles; downloadable, searchable electronic publications, namely reference manuals, user guides, application notes and product specifications on the subject of semiconductors, sensors and software; user manuals in electronic format supplied with the foregoing

- **38 for** Providing information in the field of telecommunications and telecommunications information relating to wireless communications and mobile technologies; consulting in the field of telecommunication services, namely, transmission of voice, data, and documents via telecommunications networks
- **42 for** Providing technical information in the field of computers, computer software and computer systems; providing information in the field of design and development of computer data networking; providing information in the field of network security and computer security; design for others of integrated circuits, semiconductors, microprocessors, computer hardware and software, and communications software and networks; developing, designing and testing semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software, electro technical and electromagnetic modules and their parts and building elements, data storage apparatuses, interfaces, smart cards, controllers for smart cards, controllers for RFID chips and tags for others; computer software development in the field of mobile applications; design and development of wireless communications systems for transmission and reception of voice, data and video; design and development of battery charging technology; design and development of data networking systems; design and development of network security and computer security systems; design and development of computer hardware and software for the operation and control of drones; design and development of computer hardware and software for the operation and control of robots; design and development of computer hardware and software for the operation and control of automobiles; cloud computing featuring software for transferring, storing converting and displaying medical device data; developing wireless power transfer technology for use in charging vehicles; platform as a service (PAAS) featuring computer software platforms for use in developing, programming, building, and prototyping IOT (internet of things) devices; platform as a service (PAAS) featuring computer software platforms for wireless acquisition, transmission, conversion and storage of medical device data; providing technical information in the fields of semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software; consulting in the field of telecommunications technology; design and development of wireless communications systems for authentication purposes; providing temporary use of online non-downloadable software applications, development platforms, and development tools that enable software developers to develop, program, build, and prototype software for integrated circuits, chips and data processing equipment; computer programming services; research and design of antennas for scanning, reading and interpreting RFID chips and tags; research and design of NFC (near field communications) apparatus, instruments and equipment; advisory services in relation to all the above

Date of Expiry: 09 August 2028

Proprietor: Qualcomm Incorporated
5775 Morehouse Drive
San Diego
CA 92121
United States of America

Agent: BODDEN & BODDEN ATTORNEYS AT LAW
P. O. Box 10335
Caribbean Plaza
878 West Bay Road
Grand Cayman KY1-1003
Cayman Islands

Oppositions to, or observations in respect of, the above-cited application, whose number on the Register is T0000626, should be submitted not later than the 27th day of September, 2019.

Trade mark application was received in the Cayman Islands

On: 04 September 2018

No: T0000674

Word/Mark: **SEDGWICK**

Class List:

- **09 for** Computer software for claims and productivity management and the provision of reports; Computer software for creation and maintenance of claim files; Computer software for database management; Computer software for loss simulation and risk analysis in the fields of business and business management consultation services; Computer software for insurance services; Computer software for reinsurance services; Computer software for financial services; Computer software for healthcare services; Computer software for employee benefits services; Computer software for claims and productivity management and services; Computer software for claims and productivity management and services in the fields of workers compensation, disability, liability, property, medical and lost time claims
- **35 for** Claim evaluation, namely, providing statistical evaluation of insurance claims performance measures for others; risk appraisals, namely, business risk assessment services; business appraisals; all provided to clients in the insurance, legal, corporate, and financial sectors; referrals for general building repair contracting; disaster recovery services, namely, business planning and business continuity consulting; building consultation services, namely, cost analyses in the form of estimates; home warranty identification and repair management, namely, arranging for repairs of major home systems, appliances and parts thereof provided by others pursuant to service agreements; building consultation services, namely, quantity surveyor services in the nature of cost analysis and commercial management of building construction projects for others; Business consultancy; management consultancy services, namely, claims and productivity management consultancy services in the fields of workers compensation, disability, liability, property, medical and lost time claims; business information; business administration; preparation of business reports; advertising agencies, namely, promoting the services of insurers through the distribution of printed and audio promotional materials and by rendering sales promotion advice; advisory, consultancy services, all relating to business; business management consultancy via the internet; business management consultancy, namely, advisory services relating to business administration and business record-keeping.
- **36 for** Insurance claims adjustment services for others, namely, claims adjustment in the field of auto, marine, property, and land reclamation; appraisals for insurance claims for identifying and evaluating damages to structures and property; building consultation services, namely, appraisals and valuations for structures and property; Risk management services [financial]; financial consulting services; financial analysis and financial consultancy services; processing of insurance claims; computerized cash management.
- **37 for** Building construction consultation services; roofing services, namely, roof damage assessments; HVAC contractor services, namely, HVAC assessments; water mitigation services, namely, removal of surface and groundwater to facilitate the construction of structures and building repair and restoration services; Restoration of buildings, water damage repair to buildings; repair contracting, namely, roofing contracting, electrical contracting, plumbing contracting, and building envelope contracting to perform repairs; disaster recovery services, namely, emergency building repair contracting; restoration of fine artwork and furniture
- **41 for** Education services, namely, training in the field of appraising damage to automobiles, trucks, heavy equipment, mobile homes, recreational vehicles and all forms of property; Conducting classes; seminars and courses in the fields of claims and productivity management services for workers compensation, disability, liability, property, medical and various lost time claims, business and management consultancy, recruitment, insurance, reinsurance, financial services, healthcare services, risk management and employee benefits services; conducting training courses in the fields of claims and productivity management services for workers compensation, disability, liability, property, medical and various lost time claims, business and management consultancy, recruitment, insurance, reinsurance, finance, healthcare risk management and employee benefits.

- **42 for** Surveying property for purposes of insurance claims or issuance of insurance contracts or agreements pertaining to insured property; residential and commercial insurance inspections featuring insurance inspection reports for identifying and evaluating damage to structures and property and estimating costs of repair, labor, and materials; surveying services; computer disaster recovery planning; computer service, namely, acting as an application service provider in the field of knowledge management to host computer application software for searching and retrieving information from databases and computer networks; public document filing services
- **44 for** Healthcare services and public health care services; medical counselling services; medical treatment and medical assistance services; nursing services; health care consultation, investigation and analysis services in the field of occupational health; health care consultation, investigation and analysis services in the field of duration of work-related disabilities; health care consultation, investigation and analysis services in the field of productivity; health care consultation, investigation and analysis services in the field of alcohol and drugs related problems and psychiatric problems and stress; health care consultation, investigation and analysis services all relating to health risk factors in the working environment, working patterns, management structures and systems and lifestyle; professional consultancy, counselling, assessment and advisory services relating to healthcare; professional consultancy, assessment and advisory services relating to investigation and analysis counselling in the field of health care; health care consultancy in the field of occupational therapy; healthcare consulting in the field of occupational therapy for persons with work related disabilities in the field of occupational health; health care consultation, assessment and advisory services relating to examination and analysis of injured worker productivity in the fields of occupational health; health care consultation, examination and analysis services in the field of alcohol and drug related problems and psychiatric problems and stress; professional consultancy, assessment and advisory services relating to health risk factors in the working environment, working patterns, management structures and systems and lifestyle.
- **45 for** Expert witness services in legal matters in the fields of forensics, accounting, insurance, and fraud; alternative dispute resolution services; Legal services, namely, litigation management and hearing representation for unemployment compensation dispute cases; investigation services related to insurance claims provided to clients in the insurance, legal, corporate, and financial sectors.

Date of Expiry: 04 September 2028
